

I'm an enthusiastic individual based in Mumbai with a passion for coding and continuous learning. I specialize in building dynamic, user-friendly web applications, with a strong focus on frontend development to create intuitive interfaces and bring designs to life. While I typically handle both design and development in my projects, my primary interest lies in development. I'm also deeply curious about blockchain and Web3, and I'm actively exploring decentralized technologies through self-learning and certifications. I learn fast, communicate clearly, and enjoy collaborating with teams to solve problems and build great products.

Projects

CakeCrave: Full stack responsive web application, the cake ordering app.

Tech stack: React, TypeScript, Tailwind CSS, React Hook Form, React Query and Supabase as a backend.

Project link: <https://cakecrave.txusif.me/>

MediChain: Blockchain-based healthcare dapp for secure medical record management and crowdfunding.

Tech stack: React, JavaScript, Tailwind CSS, Thirdweb, React Router, Ethers, Polygon Mumbai.

Project link: <https://medichain.txusif.me/>

Experience

Front-End Engineer | Dreambridge, Bangalore | Jan 2025 - Present

- Create and translate the UI design mock-ups into responsive design and scalable code from scratch using technologies like TypeScript, React, Tailwind CSS and NPM packages.
- Refactor and implement new features as per requirements of Dreambridge web application.
- Collaborate with the design team to ensure a seamless user experience and interface.

Full-Stack Developer Intern | Dataspeaks, Gujarat | Dec 2023 - Aug 2024

- Design and develop the landing page, web application, and admin panel using modern technologies..
- Create dynamic video content from structured data using libraries like Remotion, and Revideo.

Education

Bachelor's of Computer Science | Mumbai University | Aug 2021 - Jun 2024

Course & Certificates

- The Ultimate React Course 2024 React, Redux & More | Udemy | 2024
- The Complete 2023 Web Development Bootcamp | Udemy | 2023
- Full-Stack Blockchain Development Training | Code Eater | 2023
- Blockchain Specialization | Coursera | 2023

Skills

HTML, CSS, JavaScript, Node.js, MongoDB, React, Tailwind CSS, PostgreSQL, Next.js, TypeScript, Redux, React Query, Git, GitHub, Figma, Postman, Solidity, Foundry, React Native (currently learning)
